BACKGROUND OF THE INVENTION

0001. "Dermawear" residing in the medical field is a loin shield of cloth equipment set forth in a utility design as a useful stratagem of skill and ingenuity against the inoculation of sexually transmitted diseases of the male and female genital region.

0002. Endeavoring to achieve a purposeful end of health, "Dermawear" is classified as medical equipment, because the related subject matter of sexually transmitted diseases is the nature of this invention. Dermawear protects the male and female genital area and further defines the useful scope of its functioning authority to thwart the attainment of skin pathogens upon the genitalia of individuals engaged in sexual intercourse.

Prior Art: "Not Applicable."

BRIEF SUMMARY OF THE INVENTION

0003. The substance of "Dermawear" is its practical use as a protective garment (Fabric Shield) during sexual intercourse.

0004. The utility object of "Dermawear" is its specific action of purpose to protect its user from sexually transmitted diseases, since prophylactic use alone leaves the pubic hairs, scrotal sac, mons pubis, clitoral hood, clitoris, labia majora, labia minora, perineal body, urethral orifice, skene's gland orifice, bartholin's gland orifice, of the skin and mucous membrane exposed during genital copulation. Again, Dermawear protects these exposed areas of the male and female genital anatomy from phthirus pubis (crabs), Human Papilloma Virus (warts), haemophilus ducreyi (chancroid), microscopic genital lesions in blister function, discharging the biofluid hazard of the Herpes virus, Plaques (tinea, syphilis), sarcoptes scabiei (scabies), and other skin to skin pathogens which are transmitted in the absolute by naked sexual contact.

BRIEF DESCRIPTION OF THE DRAWINGS

0005. Figure 1A depicts a front view of "Dermawear" as a garment to be worn during genital to genital copulation.

0006. Figure 2B is an arrow pointing at the "Receptacle Rim" which is a hole cut in the fabric shield with an elastic band to grip the base of a condom covered penis.

0007. Figure 3C is a representation of the different borders that the "Receptacle Rim" can have as a shape when designed specifically and/or solely as Dermawear for women.

DETAILED DESCRIPTION OF THE INVENTION

0008. To produce "Dermawear," a person of ordinary skill in the pertinent art of garment manufacturing can make this invention without experimentation, by simply taking a 100 percent cotton fabric and interlocking (weaving tightly) the material and double-butting (a 2 in 1 garment) the cloth; and in the center of the garment at exactly the location of the penis and/or vaginal canal, cut a ½ inch hole (see Figure 2B/Drawings) or "Receptacle Rim."

0009. "Dermawear" is set apart as a new invention, predicated upon its intent of application in utility as a wearable medical garment that shields the area of the genital skin not protected by a condom during sexual intercourse.

00010. "Dermawear's" intent of application makes it dissimilar from all other garments and it is therefore a new invention.
